HOW TO USE

Traffic cones are used to delimit and highlight working areas, for maintenance operations, during the making of the horizontal road markings, to indicate areas affected by accidents, for temporary channeling, for temporary marking of opposite directions of traffic, and to limit temporary obstacles. They complement the use of appropriate vertical signs.

For more information on how to use them, please refer to the regulations in force in the country of use.

The cones are resistant to impacts and atmospheric agents.

In the conical part the bands are painted with a special acrylic paint to increase the visibility of the cone.

The base of the cone is shaped to allow greater visibility and to reduce the risk of the cone rolling away after falling.

PACKAGING

CODE	PACKAGING	QTY/BOX	BOX/PALLET
S2002PVCFB	box	20 pcs	24/27
S2003PVCFB	box	10 pcs	24/28
